

Pantano Wash 10/17/2021

We had 23 participants come out to investigate Pantano Wash at Michael Perry Park. The course was a 1-hour score-o with multiple choice questions at each control point for a total of 30 possible points. We all appreciated the cool morning weather at the start.

Jeff Coker led the field finding all of the points in 39 minutes (he pre-ran the course also acting as course vetter). **Alan Craig** followed, taking 50 minutes to find nearly all the points within one hour. The team of **Kelsey and Todd** were next best with 20 points. Several runners reported that they went over time after choosing to remove masses of prickly grass seeds from their shoes - all while on the clock.

We were happy to see a few graduates from the latest “learn to orienteer” class at Greasewood park. The next class is scheduled for October 31 - check the website for the latest news and meet dates.

Thanks to **Jeff Brucker** for designing the course and leading course discussions and to **Peg Davis** for running registration/check in. **Jeff Coker** served as course vetter. **Lukas Luis** checked the quality of the park playground and declared it “excellent”.

By Melissa Trout, Meet Director
